> More about Adgenera srl

The company AD GENERA works alongside the R&D divisions of manufacturers and suppliers of the automotive industry, providing know-how and experience to support the acceleration of the pace of innovation and minimize the time-to-market of products.

Adgenera collaborates with the Customer, contributing:

- a wealth of specialist experience in applying electronics to the automotive sector;
- continuous updating on new trends in the world of electronics;
- knowledge of the components available on the market and expertise in their selection;
- strict compliance with the requirements formulated by the Customer;
- experience in the calibration of system parameters looking for the best performance, consumption and emissions;
- search for solutions that minimize costs without penalizing system performance.
