> More about HYSYTECH

Hysytech srl is a Chemical Engineering Company established in 2003, in Turin, Italy. Today it is a pioneer company in the field of **process engineering** and in the **design and construction of turn-key plants for fuel chemical processing, energy production and environmental treatment**. The company has always based its business model on innovation and expertise in finding innovative solutions, always looking to develop and provide new technology to clients on short and medium-term opportunities through continuous work and challenging development. Hysytech has 4 different business areas: **Construction of turn-key industrial plants (EPC and EPCM), Applied R&D, Consultancy (technical and financial)** and **Maintenance**.

Hysytech's experience and technological background cover several fields: from process synthesis to industrial catalysis, from process optimization for renewable energy production to environmental treatment.

To be able to offer specialized service, Hysytech makes a continuous effort to increase the **proprietary know-how and technical expertise**. Almost 30% of the revenues are invested every year in internal technology developments.
