

FRAP

> More about FRAP

FRAP is an Italian Manufacturer of steering and suspension components founded in 1932. It is highly specialized in engineering, developing and manufacturing suspension arms, ball joints, steering linkages, stabilizer links and silent blocs for passenger cars, commercial vehicles, tractors and special applications. The steps carried out by FRAP every day, on all products, in its plants are: engineering, hot forging, hardening and tempering treatments, working, grinding and rolling, surface protection treatments, final assembling and packing. FRAP testing laboratory constantly guarantees high quality levels through the most advanced inspection procedures.

FRAP high technology levels and quality standards have brought many important first-equipment customers such as FIAT GROUP, ALFA ROMEO, PEUGEOT, RENAULT ALPINE, LAMBORGHINI, PIAGGIO, KTM, SAME DEUTZ-FAHR GROUP, CNH and AGCO GROUP.

FRAP's certification: ISO 9001, ISO 14001, ISO 18001 and ISO/TS 16949.
