## > More about BISIACH & CARRU'

Since 1955 BISIACH&CARRU' has established itself as a milestone for research and development in technology through intensive work in advanced design, with a special look forward to the future.

A well affirmed mechatronic approach has led to what Bisiach&Carrù is nowadays: a masterpiece of engineering.

A wide range of turnkey solutions are dedicated to aeronautic needs, in particular:

- design and manufacture of drilling/riveting automatic systems
- robotized systems for aircraft components assembling
- automatic systems for positioning, drilling and stringer/clip riveting
- robotized systems for machining on wings (drilling, riveting, sealant application, measuring, etc.)

BISIACH&CARRU' mainly operates in the aerospace and automotive fields
