ARES

> More about ARES

ARES, active in Italy and in foreign countries as consulting, engineering and project management, works in several sectors as quality-environment-safety-energy, aerospace, automotive, CE mark assessment, occupational health and safety, education and training.

ARES, holding high professional skills in its team, should be a qualified partner to companies for:

- Solutions for management, effectiveness, productiveness and resources saving
- Support to occupational health and safety management
- Solutions for safeguard and improvement of environment conditions
- Conformity assessment with safety and health requirements for products
- Consultancy for implementing and management of aerospace products and organizations
- Design and consultancy support for technical development
- Educational and training
