

ITALTECNICA SRL

> Automotive

Market Channel / Automotive OEM/OES / Passengers Cars /
Internal Combustion Engines / Customer's Product / Automotive
Aftermarket / Mechanical Engineering / Competence Area /
Hydrogen Fuel Cell Propulsion Systems / Components Subsystems
& Systems / Sport, Super & Hypercars / Energy Efficiency /
Manufacturing Technologies & Production Management /
Prototyping / Compressed / Liquified Gas Fuel Systems /
Challenges / Model Construction & Show Cars / Hydrogen /
Manufacturing / Suspension System, Wheels & Tires / Testing,
Validation And Certification / Mechanical Machining / Frame / Body
/ Cabin

> More about ITALTECNICA SRL

Italtecnica's activities started in 1986, enjoying more than 15 years of success in competitions all over the world with Peugeot Sport.

In its 6 test benches, it is possible to carry out validation or development tests, both on Diesel and Gasoline engines. Each test bench is provided with special equipment and measuring instruments, of ISO9001:2008 quality standard.

Starting from the high engineering and mechanical skills acquired during the years of activity in the car racing field, ITALTECNICA is expanding and improving the company, investing in research and development, firmly believing that the motorsport provides an excellent field to develop and test new technologies.

Based on that, ITALTECNICA is also working on the development of hybrid engines, in collaboration with Actua – spin-off society of the Politecnico di Torino.
