Aerospace, Cleantech & Green Building

> More about DELTA-TI IMPIANTI

Founded and managed by the Biginelli family, DELTA-TI has worked in this sector for 90 years now and is one of the leading Italian E.P.C. companies.

We are specialized in the engineering, development, and implementation of large-scale technological, energy systems and infrastructures.

DELTA-TI implements huge turnkey projects taking care of every aspect related to engineering (conceptual and executory), implementation (plant and civil works) and services (construction management, safety, systems management, and maintenance).

DELTA-TI cooperates with a qualified network of technological partners who support its innovation with the most advanced technology and components.

Thanks to this skill, DELTA-TI works as a General Contractor leading several projects (both in Italy and abroad) on behalf of industrial and service companies, public bodies, and research centers.

DELTA-TI IMPIANTI

Highly-skilled engineers, computing resources and applicative software ensure that each project is approached with the right resources and skills. DELTA-TI owns the SOA certificate (enabling it to work with public corporations/organizations) and is certified with RINA body according to ISO standards. DELTA-TI mainly works in the aerospace, agrifood, cleantech and smart manufacturing fields.
