## > More about L.M.A.

LMA is a leading global supplier integrated solutions to the most important players in the civil defense and space sector.

A whole set of in-house capabilities gives us the ability to provide customers with any combination of service required from the detailed-design, passing through build-to-bring manufacturing, to assembly- and anything in between with flexibility and efficiency meeting the highest quality requirements.

LMA has the capability to form and a machine small, medium and large parts up to 8000x4500x2000 mm of any material used in the aerospace industry: Al alloys, Ti alloys, composites, Inox, Inconel, PM steels, Mg alloys, Cu-be.

The company excels at being a TIER 1 Integrator filling the gap between the main customers and the traditional subcontractors by integrating the supply base.
