O.M.R. OFFICINA MECCANICA RAVERA

> More about O.M.R. OFFICINA MECCANICA RAVERA

O.M.R. was established in 1980 as a turning and milling workshop for conventional machine-tools. Today it is a successful company in precision mechanics, capable of machining for third parties in various production fields.

Thanks to a corporate philosophy aimed at continuous quality improvement, O.M.R. has also been designing and building its products since 1997.

The company's primary goal has always been to satisfy specific customer requirements.

O.M.R. is a mechanical company with a staff of 62, with premises on an area of 20,000 sqm of which 8,500 sqm is covered. It is subdivided into 7,000 sqm for mechanical machining and installation and 1500 sqm for storing and dispatching the finished items. O.M.R. is organically structured and equipped to cater for any mechanical request in general.

All of these characteristics have contributed to the company's achievement of the UNI EN ISO 9001-2015 certification, issued by certifying body DNW.

O.M.R. operates in the automotive and smart manufacturing fields.
