> More about Famas

In Trivero, since 1976, Famas runs the manufacture of technical textiles, with great focus on the quality, concentrating all the company's efforts on organization, quality and customer service.

Around these principles, the manufacturing process for satins and table felts takes form. These are key elements in the process of decatizing mixed wool and synthetics. This operation provides high dimensional stability and the "hand"(feel) of the fabric, for the greatest quality finish possible.

The Famas technical textiles are created from the combination of raw materials selected by a qualified staff and a technologically advanced manufacturing system, which is monitored to guarantee the highest quality.

FAMAS is certified UNI EN ISO and mainly operates in the automotive and textile fields.
