> More about CROSETTO

AGRIMEC di Crosetto Elio & c. snc. was founded in 1936.

At the beginning, the company started by the production of agricultural tools and carriages; therefore it focused on investing on design, new projects and innovation for the production of trailers, manure spreaders and slurry spreaders.

the list of available machines is as follows:

- Double and triple mono tube axle tipping trailers from 5 mt. to 7 mt. of length.
- Single, double and triple axle flat trailers from 4 mt. to 9,70 mt. (according to customers' needs), every machine can be equipped with tool box, bale holder, manual or hydraulic ramp.
- Single, double and triple axle dumper trailers from 4 mt. to 8 mt. of length and loading capacity up to 50 m³. These trailers can be equipped with both a 140 cm./180 cm. loading bed and a 40 cm./80 cm. side extensions.
- Single, double and triple axle manure spreaders from 4,50 mt. to 8 mt. of length with 2/4 roller spreading system, suitable for organic product, biogas and compost waste. All models can be equipped with either larch or iron walls and several other options.

CROSETTO

- Single , double and triple axle slurry spreaders with capacity from 2700 Lt. to 35.000 Lt. . All models are equipped with a frame detached from the galvanized tank and can be equipped with several other options according to the customer's needs.
