> More about Vifra

Vifra is specialized in the production of own-brand and customized products under the Customer's brand for sectors such as taps, heating, plumbing, objects and household goods. The company designs and develops new products to measure, starting from the customer's project: it creates the most suitable mold to satisfy the productivity request, guaranteeing maximum functionality and ensuring the maintenance of molds and machinery through the equipped internal workshop.

Vifra offers its Customer a Made in Italy supply chain: from design, prototyping, purchasing of raw materials, up to the creation of the mold and customization of the product. Each company phase is followed and supported by quality personnel and a trained and qualified technical office with 35 years of experience in molding. Vifra is able to make your product unique thanks to services such as chrome plating and multiple finishes, laser engraving and screen printing. It also offers services including: assembly, packaging, wrapping, and finally taking care of the shipping of the finished product.
