> More about AUTOSTUDI

AUTOSTUDI is a design company operating in the automotive and industrial design that carries out the project as a consultant of the big houses, big brands and their suppliers. AUTOSTUDI has a structure characterized by the professionalism of its designers and engineers which allows the optimal management and project development step by step in interfacing with the customer. A methodological path that goes from the stylistic phases of the project aimed at the production: style, rendering services, feasibility studies, maquettes, prototypes.

AUTOSTUDI mainly operates in the clothing, smart manufacturing and automotive fields.
