

Regis Motors

> More about Regis Motors

Regis Motors SRL is an innovative start-up that produces an entire family of Full Electric vehicles, called Epic0, with competitive technological contents and exclusively equipped with proprietary powertrain systems.

Epic0 is a compact electric vehicle, classified as a heavy quadricycle in the commercial version with L7e CU approval. The project was created to meet the needs of the goods distribution of the so-called "last mile delivery" and the distribution of goods in general, with a vehicle capable of carrying out daily activities within urban centers.

The target market of Regis vehicles is divided into 4 main groups:

SMEs: Small and medium enterprises - Artisans - freelancers (sales through dealers)

Fleets: Large companies - Long-term rental (Mecaprom direct sale)

PA: Public Administrations-Entities (sale through dealers and dedicated agents)

Fitters: Body shops specialized in the creation of special products (eg: MSW, food transport) from a single body, according to the modular platform.

The company offers two similar types of vehicles, distinguished by different sizes and capacity: the Epic0 model has a capacity of 700 kg with a length of 3.7 m., while the Epic0 Compact model is characterized by smaller dimensions and a capacity of 400 kg and a length of 3 meters, better performing in agility and handling.
