> More about GECO

For over 20 years system integrator in the implementation of tailor-made projects in the railway sector.

Geco designs advanced solutions for passenger information and communication for the transport sector and realizes intermodal systems of coordinated information (both stationary and on board). The company uses CCTV (CCTV) and VAT cameras and creates innovative access control systems. In addition, as the only Italian reseller of MOBATIME, global leader for clocks and time synchronisation, it guarantees accuracy and reliability. Its expertise also includes sound diffusion systems and the development of artificial intelligence application solutions.
