> More about BEINAT

Beinat S.R.L. was born in 1978 in Ciriè, in the province of Turin. In 40 years, the passion for electronics and the ability to always offer innovative and advanced products have made Beinat a top-level company in the sector of gas safety for civil and industrial use, gas detection controllers, gas sensors, temperature control, fire sensors and much more. Company entirely Made in Italy, it looks towards foreign markets that inspired proposals for innovative and refined proposals and in which it exports most of its production. Beinat products are found all over the world: from Europe to Africa, from Asia to the America, its goal is to guarantee useful systems and tools for civil and industrial safety, whether it is gas or fire alarms, thermoregulation and professional portable instruments for electronic control.
