

COMIMPORT ITALIA SRL

> More about COMIMPORT ITALIA SRL

Comimport is a leading Italian company specialised in the welding of plastic components: since 1976 the company supplies an automation welding technology useful to assembly parts in thermoplastic material. By virtue of a strong know-how of the welding technology Comimport manufactures machines capable to control every parameter of the welding. The company guarantees a complete service, from the feasibility of the whole equipment to the project of the single parts to be welded, the construction of the assembly machines and the post sale assistance. The welding technologies used are ultrasound, hot plate, vibration and gluing, together with complex automation systems.
