> More about Seas

The company excels in the fields of design and product design, spanning various application areas from automobile bodies (both interiors and exteriors) to two-wheeled vehicle engineering. The team of around 40 engineers, capable of dedicating over 70,000 hours per year, tackles every project challenge efficiently, reducing delivery times.

Seas' expertise extends to specialized one-off and small series engineering, with approximately 30 projects completed in recent years. The Company meticulously sets up each project, guided by a culture of engineering excellence and a focus on detail. Collaborations with top design centers fuel their engineers' creativity.
