

Manifattura Automobili

Torino

> More about Manifattura Automobili Torino

Manifattura Automobili Torino is a niche car manufacturing company able to conceive, design, develop, engineer and manufacture automotive special projects. The production is focused on super and hyper cars produced as a one-off or a limited serie according to the desires of the client. Since 2019, we started focusing on electric cars, developing the Aspark Owl, whose performance is not comparable to any other hypercar on the market. Lately, M.A.T. is investing on the development of e-mobility software application and on high-performances battery for niche applications.
