> More about Gianeco srl

Gianeco S.r.l. is a worldwide plastic recycling and trading company. For years we have been dealing with the recovery of different polymers, starting from poliolefine-based PP e PE and engineering polymers like ABS, PC, PA, PS, PBT, PEI, PES, focusing more and more our main activity on the thermoplastic elastomers and bioplastics.

In the field of thermoplastic elastomers, we can offer our customers a wide range of near prime, off-grade and recycled materials like TPU, SBS, TPE, SEBS, EVA, TPEE, TPO, TPS. We are able to produce customized compounds for different requirements and applications.

Gianeco srl

In order to complete our mission for a greener and cleaner environment, for years we have been being engaged in the promoting, marketing and reprocessing of compostable and biodegradable polymers, where Gianeco S.r.l. offers a primary service in Europe. We are proud to be involved and contribute in the recycling of renewable and eco-friendly materials like PLA, PBAT, PHA, PHB, PCL, PBS. The idea behind bio-based polymers is to replace the fossil oil carbons by carbons obtained from renewable and eco-friendly sources (sugars in plants), in other words, to create polymers from renewable natural resources and allow packaging to decompose quickly and get back to nature.
