> More about MCF SAFETY BELTS

MCF Safety Belts is a Company that from 1989 operates at international level in the research, development and production of safety belts for first equipment and for special vehicles.

We address to companies which produce motor vehicles, buses, motorhomes, ambulances, disabled wheelchairs, fire-proof means, ultralight means, navigation, prototypes, farming, elevator trolleys.

With our technical department and our test laboratory we can plan the safety systems according to the particular customer's needs, and when required we follow all the procedures to obtain the homologations at the authorized companies.

OUR PRODUCTS: 2 and 3 point static and automatic belts, 4 and 6 point for competition, belts for stretchers, semifinished product for antifall systems, retractors for road traffic signs and many others.

MCF Safety Belts follows its customers from the stage of study and development of the safety belt until the homologation at the authorized companies.

With our qualified technical staff and our equipped test laboratory we always try to plan the best restraint system recurring to the data and the experience developed in more than 10 years of expanding activity.
