> More about CERRUTI SRL

Cerruti Srl is an Italian manufacturer specializing in agricultural machinery, based in North-Eastern Italy. Established in 1958, our headquarters are now located in Castell'Alfero, at the heart of Monferrato.

For over 30 years, Cerruti has been a leader in snow blower production. Our machines are available in both mechanical and hydraulic versions, with working widths ranging from 60 cm to 270 cm, catering to a wide range of applications and designed for both small users and large-scale operations.

In the agricultural sector, Cerruti specializes in flail mowers, lawn mowers, and rotary plows, all compatible with any type of walking or compact tractor, offering versatile and reliable solutions for various needs.

Our workshop handles most of the assembly, and with advanced machinery, we produce 80% of the mechanical components in-house. This vertical integration allows us to customize each machine to meet the specific needs of our customers, ensuring high-quality, tailored solutions. Close collaboration between departments guarantees the excellence of every product.

CERRUTI SRL

Our commitment to fast delivery, in-house production, reliable after-sales service, and adaptable solutions has earned us the trust of customers across Europe.
