## > More about EUROGRANDINE S.R.L.

EuroGrandine is an Italian company specializing in hail damage repair using PDR technique. The PDR (Paintless Dent Repair) is a craftsmanship process that involves using levers and hammers to apply a series of pushes and gentle pressures to the metal sheet of an automobile to restore it to exactly its original state. This allows for faster turnaround times, lower costs, better quality results, and most importantly, less CO2 consumption.

EuroGrandine restores hail-damaged vehicles using the PDR technique and offer comprehensive claims management to major players in the insurance and automotive industries.

Artfully executed paintless dent repairs, promptness of intervention and extreme care for customers, make us the ideal partner to rely on.

7000 + cars repaired per year, 100 + PDR technicians, 900 + associated body shops: these are some of our successful numbers.
