Market Channel / Automotive OEM/OES / Automotive Aftermarket /
Competence Area / Others / Prototyping / Testing, Validation And
Certification

> Other key sectors

Aerospace, Fashion Luxury Design, Mechatronics

> More about CHECK SOLUTION SRL

Check Solution teams up in a network with 2 more companies - Effe Design and GDM. This cooperation enables us to provide our customers with a full service to meet a wide range of needs in the automotive, aerospace and railway sectors.

The measurement service is performed at the customer site through anthropomorphic arms and laser trackers. The professional background of corporate management allows us to produce a "design" of measurement that defines the best technology to be adopted. Moreover, it is possible to make a report and to calculate the uncertainty associated with the measurements as a function of external parameters that might have an impact.

The activity is geared toward the automotive market, in many of its divisions: the style, equipment, checking fixtures, molds.

Check Solution mainly works in the aerospace, automotive and smart manufacturing fields.
