> More about Avio Composite srl

AVIO COMPOSITE SRL is specialised in producing products in composite laminates and plastic. It was established in 2010 and has a 500 square-meter plant with ten operational units and personnel with 25 years experience in the aerospace composites sector.

The company is divided into two principal sectors:

- producing end-to-end composite products, involving special processes (lamination, polymer processing and finishing);
- producing composite moulds;
- mechanical trimming and drilling processes using traditional methods.
