Technical Knowledge S.r.l., certified UNI EN ISO 9001 and also IATF 16949 according to automotive standards, has been collaborating for over forty years with the technical offices of the best engine manufacturers and with the most important research centers.

We provide our experience in design and co-design in the field of engine seals, heat shields and many other engine components and when the customer needs a partner in troubleshooting and product optimization.

Our R&D department researches and experiments with cutting-edge solutions to meet the needs of customers, not only in terms of performance, but with a careful eye on costs and ESG (Environmental, Social, Governance) aspects.

We supply products directly to OEM customers, supporting them from the prototyping phases, through product development, to mass production.
