## > More about VALKYR S.R.L.S.

We are an engineering application company based in Turin. Valkyr is organized in four divisions which are designed and optimized to provide different services. The specific knowledge and the strong and efficient collaboration between our business units are the keys to our success. Our extensive background in design, manufacturing, R&D, advanced technologies, racing and technical management gives us the capability to offer a great and complete solution. We have developed our own proprietary products, processes and technologies for the most demanding applications in motorsports which reflects our top level technologies, knowledge and quality. Whether it is our own project or a customer project we bring ideas to successful top quality products by leading the entire development process or a specific part of it.
