## > More about PROTEGGI ITALIA S.R.L.

Smart and flexible company, Leader in the study, design and development of 'smart textiles' in Italy. Partner for the activities of research, development, assistance, advice, test and training for all the textile sector. What we do: We work on high tech solutions, in which classical textile technology is the groundwork for new materials for completely new applications. How we work: In team with industries (not only textile ones) and research centers specialized in electronics, chemistry, informatics.
