

D.M.D. COMPUTERS

> More about D.M.D. COMPUTERS

DMD designs and produces high quality and reliability Visual Acuity Chart Systems, sold worldwide both under its own brand VistaVision, or as an ODM (Original Design Manufacturer) for prestigious firms.

While once VistaVision was just one single vision chart system, it has evolved in a set of products. VistaVision family includes now a high tech polarized and computerized visual acuity chart. Soon, new other products will join VistaVision family, always following the same mission: high technology, continuously clinic and scientific improvement, high reliability, 5 years warranty, at a really lower price than same level's competitors.
