

MPE S.R.L.

> More about MPE S.R.L.

MPE was founded in 1973 by Mr. Giorgio Battagliotti, it is an internationally established company specialized in the production of precision technical items in thermoplastics produced using the technologies of injection molding, blow molding and injection blow molding (Pressblow molding).

Competencies, expertise and skills accumulated in over forty years of activity, combined with continued efforts in terms of quality, have enabled MPE to consolidate the recognized position of a reliable and punctual partner at a both national and international level – thanks also to its foreign subsidiaries MPE USA, MPE Balkan and MPE Mexico and the newly born MPE China.

In addition to production, MPE offers its customers consultancy, design and co-design, development of new components and assembly services, mainly for the automotive industry. Our customers are primarily first level suppliers (Tier 1) and, increasingly, the automakers (OEMs).
