

Fibet

> Automotive

Market Channel / Automotive OEM/OES / Passengers Cars /
Autonomous Driving - ADAS / Customer's Product / Automotive
Aftermarket / Commercial Vehicles, Trucks & Buses /
Mechanical Engineering / HEV-PHEV-BEV Propulsion Systems /
Plastic & Rubber Transformation / Competence Area /
Agricultural, Earth Moving Machines And Special Off-Road
Vehicles / Components Subsystems & Systems / Sport, Super &
Hypercars / Manufacturing Technologies & Production
Management / Motorcycle / Prototyping / Molds Construction /
Electrification / Challenges / Micromobility / Transmission /
Hydrogen / Manufacturing / Suspension System, Wheels &
Tires / Testing, Validation And Certification / Steering System /
Mechanical Machining / SW / Data Management / Tooling &
Production Equipment / Frame / Body / Cabin / HVAC

> More about Fibet

Fibet was founded in Turin in 1952, in an environment of worldwide industrial excellence, namely the automotive sector. At first, it produced metal-elastomer Bushes and associated vibration isolation components for the automotive industry. Then, in the Seventies, Fibet expanded its operations into other market sectors – ranging from agriculture, railways, earthmoving machinery, aerospace, marine and any other industry sector that needed solutions to vibration issues.

Our expertise and competence make Fibet the ideal partner for any requirement – whether the application needs a custom-made solution, the use of standard catalogue products – or a combination of both to reduce the capital outlay associated with tooling. This is achieved through the combination of our wide-ranging skills and experience, enhanced by research and design, whilst also listening to thoughts and ideas from our clients, to ensure that we always deliver the optimum and cost effective solution even for the most complex problems.

Fibet

In this context, our R&D Team are constantly working on new patents, thus developing a distinctive “Fibet approach”, a benchmark that assures our sustained and continued growth.
