> More about CODEX

Codex is a company with over 35 years of experience in manufacturing mechanical components for OEMs, Tier 1 and Tier 2 suppliers in the automotive, industrial and water movement and management sectors.

The company specializes in producing a wide range of components, including oil regulation valves, rotors for vane and oil pumps, drive shafts, pins, flanges, hubs, and spacers, intended for various automotive applications. All products are manufactured following strict quality and engineering processes, ensuring high standards of performance, quality, and economic competitiveness.

The main processes offered by Codex include assembly, washing, broaching, drilling, milling, grinding, bar turning, and secondary turning. Additionally, heat treatments and stamping are outsourced to specialized partners to ensure the highest quality and compliance with required standards.

Codex is certified according to IATF 16949:2016, ISO 9001:2015, and ISO 14001:2015, demonstrating its commitment to process quality and environmental sustainability. Furthermore, the company has been awarded the EcoVadis Silver Medal, recognizing its responsible practices in ethical, environmental, and social areas.
