

CODEX

> More about CODEX

Codex has 30+ years of experience in the production of complex mechanical components, serving top-notch Tier 1 and Tier 2 businesses all around the world.

Our processes include turning, milling, grinding, assemblies and all the collateral aspects of production: surface and heat treatments, lab tests, production and management of components with a bill of materials, creation of dedicated packaging as well as a rapid and well-organized logistics.

Codex is part of a technology center located in Northern Italy dedicated to the automotive industry, thanks to the presence of a well-developed supply chain, covering all the needs of our productions.

We hold IATF 16949 and ISO 14001 certifications and we apply the Kaizen methodology as well as Lean Manufacturing principles, to comply with the standards set by Industry 4.0.

Codex is always looking for new challenges, in the form of brand new projects, to satisfy existing and future clients following their quality and safety standards.

Codex mainly works in the automotive and smart manufacturing fields.
