## > More about CHIMIMETAL

Chimimetal was founded in 1997 and is a leading company in chemical etching and laser cutting technologies.

The company operates through four locations in Italy, with the headquarters based in Mongrando (BI), Italy.

Chimimetal S.r.l. offers high-precision solutions for various industrial sectors, such as:

- electronics,
- mechanical engineering
- automotive
- eyewear
- design
- jewelry

Chimimetal has expanded its expertise by incorporating advanced technologies, such as laser cutting and combined chemical etching and laser cutting solutions.

Globally recognized for its experience and innovation in the metal processing industry, Chimimetal provides cutting-edge solutions to meet the needs of diverse sectors.
