> More about FOGLIZZO LEATHER

FOGLIZZO was founded in 1921 as a supplier of high-quality leather for antique car restorations and its work has expanded into the yachting, aviation, motor, boutiques and residential interior design industries.

Foglizzo leather is sourced from some of the finest tanneries in the world, primarily in Italy, and all processes are in accordance with international quality standards.

FOGLIZZO can produce an alternative finishing, texture and treatment, as well as match any colour or even create a custom pigment and can complete the leather with an embossing designed to enhance its grain surface. The spirit of excellence is evident through the meticulous attention to detail and to preserve the natural beauty of the leather.

FOGLIZZO LEATHER mainly operates in the design, automotive and textile fields.
