> More about CARMEC

Since 1966, CARMEC design, develops, produces and install Innovative Moving Solutions: Car Lifts, Elevators for Cars, Mechanized Parking Systems, Movable Floors for Swimming Pools are just few examples of the whole range of products.

CARMEC has been working into the field of civil and industrial handling and lifting.

CARMEC

Since 1990, building on the experience gained with the realization of the first models of lifting platforms in Italy, it focused its activity on the production of mechanized systems for the parking of cars and vehicles of significant weight and dimensions. Thanks to almost 50 years of experience and the implementation of more than 2,800 parking systems, CARMEC is now one of the leading companies in the sector, both in Italy and abroad, and has acquired recognized expertise in design and production. All our systems are certified and can be customized to optimize the available spaces and fully meet the expectations of our customers. CARMEC supports its customers from the definition phase of the project until after its implementation, also thanks to the involvement of its local partners. Local collaborations with collaboration company have brought CARMEC to be very well known for this philosophy Bespoke Moving Solutions. We collaborate with professionals, design offices, construction companies and work with individuals. We are a small and medium-sized dynamic company working on the Italian market but we have also installed several systems abroad, including: in Switzerland, France, San Marino, Monaco, UK, Germany, Bulgaria, Romania, Denmark.

CARMEC srl mainly operates in the design and cleantech fields.
