> More about NUOVA ALLEMANO

Unique timepieces which tell a valuable story and represent an experience for those who choose them.

With the brand new Misuratori del Tempo, Allemano brings tradition back to life and reintroduces its instruments' daily use. Just like the manometers which were to be found on board of the legendary FIAT 501 Torpedo.

Thanks to the 1919 Collection, after a century, Allemano communicates one more time directly to those who, as back then, are seeking for emotions and style.
