> More about LENTI

The history of Lenti is the story of over fifty years of success achieved through the constant search for excellence and a special sensitivity in grasping and interpreting the signs of change in fashion trends. It was founded in 1966 by the entrepreneur and goldsmith Flavio Lenti in Valenza, one of the most famous centers of Italian goldsmith art.

For over half a century, the company has dedicated itself to the design, production and sale of jewelry and precious metals. Ranging from a wide range of custom-made handmade products to refined jewels with precious and semi-precious stones, the company finds its strength in an important sample ready on stock that customers use to solve any type of request.

The main objective is to serve chain stores or companies willing to distribute their products available for immediate delivery for goods in 18 kt. The company also has a website and a dedicated e-commerce with the products available. The purpose is to not create a warehouse for customers, but to be directly their always available warehouse. Main target: satisfying the customers with quality and availability.
