

MORO SERIZZO

> More about MORO SERIZZO

High craftsmanship of natural stone is at the heart of our company Moro Serizzo. The concept is applicable to every aspect of contemporary living: indoor and outdoor furniture, construction, architecture, applied arts. The attention to naturality and sustainability expresses itself through Pietre Trovanti - a project which enhances irregular offcut stones from the Ossola Valley, transforming them into art and design objects. The collection brings to life, following a design vision inspired by nature. From each end a new beginning.

The handcrafted collections involve collaborations with designers, artists - emerging and of international standing. They evoke a delicate, unique, essential beauty.
