> More about VANNI Società Benefit

VANNI eyeglasses were born in Turin in 1990, made to see the world. They are equally at home in Milan, Paris, New York, Tokyo, and Sydney. VANNI is at the forefront of the industry of creative eyewear design. Its beauty is a mix of genius, culture, and style, and never accidental: a distillation of thirty years of research and experimentation.

When it comes to colour, daring, mixing, and creating unique pairings has always been our challenge. Unique and yet recognisable: the essence of the VANNI glasses is contained in its exclusive materials: acetates in original patterns, metals with refined finishing.

Since 2021 VANNI is a "società benefit" (benefit corporation), pursuing objectives of common good, beyond those of profit, monitoring the social and environmental impact it produces. For a choice without compromises the VANNI glasses are Made In Italy, for sure, manufactured in production units only 400 kilometres from our headquarters, on Italian soil: the best of limited-edition manufacture.

VANNI Società Benefit

VANNI is not so much craftsmanship as limited-edition industry.
