> More about Antique Mirror

For over fifty years *Antique Mirror* has dedicated itself to the research and the creation of special products in the world of flat glass.

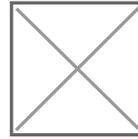

We offer a wide selection of antique and decorative mirrors for several applications: covering furniture, columns, tiles, furnishing accessories, design objects, etc.

Continuous research in the sector enabled the development of various product applications, including tiles, mosaic panels and objects for the home.

For years we have been collaborating with dealers present throughout the whole world. From Italian wholesalers to Saudi Arabian glassworks, passing through French architectural firms and American distributors. Over the years we have developed an increasingly wide network of customers not only in terms of quantity but also in terms of sector of application. The possibility of working the material internally, gave us the opportunity of selling cut to size pieces and brought us closer to companies with local realities.

Hotels, casinos, cruises, concept stores, boutiques and restaurants are just some of the locations where you can admire our products.
