

ZINOX LASER

> More about ZINOX LASER

ZINOX LASER has been active since many years in the field of processing fine sheet metal and laser cutting sectors as well as in the welding, milling, marking application fields exploiting cutting-edge manual and robotic machineries.

ZINOX LASER is specialized in the planning and manufacturing of stainless steel components for top-notch Italian and foreign industrial Groups active in the main product sectors. ZINOX LASER thanks to the remarkable investments in latest generation of machines, started as a small craft business has become one of the main company in this area. The company is able to supply products on which polishing, stamping, chrome, plating and varnishing processes have been carried out.

Our assembly and packaging departments allow us to offer our clients finished products packed according to the client's requirements.

We pay the utmost care to test every prototype and product that undergo strict testing to check the perfect functioning of them to guarantee to customers state-of-the-art operation and top quality functionality.
