> More about VETRERIA ARLETTI S.A.S. DI MILANESE MARCO

VETRERIA ARLETTI historic company, founded by Milano Arletti in the early thirties and whose name it bears, was founded with its current name in 1952 and it specializes in the production of mirrors and curved glass for automotive, cosmetics and furniture. Born out of the passion for glass processing, handed down from Marco's father, Luciano Milanese, Arletti's trusted collaborator, to his son, over the years it has developed new sectors such as. Lighting, chemistry, boating and mechanical engineering. In particular, the company has specialized in the production of convex mirrors, entirely made by hand and mirrored in high vacuum bells. This type of production, suitable for classic or modern style furnishings, can be customized according to customer requirements, by size, radius of curvature, color. Furthermore, the great attention shown to the needs of our customers, from both domestic and foreign market, has allowed Vetreteria Arletti to improve and modernize production techniques, in order to create products characterized by higher and higher quality standards
