> More about Teledif Italia

Since 1993 **Teledif Italia** has been designing and producing telecommunications devices for telephony, elevators and "Spazio Calmo" premises: inter-telephone interfaces for analogue, voip and GSM lines; intercom-telephone interfaces for analogue, VoIP and GSM lines; remote alarms and communication systems for lifts; speech synthesis for elevators and various uses; Two-way communication and information systems for Calm Space premises and emergency stations; Digital Diagnostic, Monitoring and Communication Systems for Elevators and Escalators (LIFT MONITOR UNIT).

It has been ISO 9001 certified since 2002.

In 2017 it acquired **CALL4U SYSTEM**, a company specialized in 24-hour call center services for the management of emergency calls. In 2020, with group company, Logical Systems, it developed a system for the support and management of the call center proposing a technologically advanced assistance model that meets every specific customer need. Logical Systems has been developing software since 1989, offering support for data protection from potential digital threats and for IT security on servers, PCs, networks and software applications.
