> More about ALBA ROBOT SRL

The company was founded with the mission to deliver a micro mobility solution and platform to revolutionise people's transportation in pedestrian areas (indoor and outdoor) by using autonomous vehicle fleets. In particular, ALBA Robot aims to help People with Reduced Mobility (PRM) move more independently and to become a global leader in the provision of solutions for autonomous/assisted mobility services to facilities, by using the best technologies available, from Automotive, Robotics, Artificial Intelligence and IoT services.
