> More about IMAGO VFX

Imago is many things: an image, an idea, a dream, but also a condition of maturity, the last stage of metamorphosis that many insects live when they become adults and for the first time they open their wings after many different lives.

It is precisely the desire for growth, change and experimentation that has brought together Italian and foreign talents, esteemed professionals in the Visual Effects and Post-Production world.

In September 2018, these forces have united to give life to IMAGOVFX, an innovative Start-up, a new Italian reality that can support international projects in post-production and VFX process.
