> More about Bagubits srls

Bagubits is a web agency established in 2012 with a vocation for web project development.

The level of specialisation we have achieved over the years now allows us to create vertical ad-hoc solutions on the customer's behalf, tailor-made websites, authentic 'tailor-made solutions' sewn to the customer's specific needs.

Customisation and precise, comprehensive product development are the cornerstones of our core business.

Our team consists of a close-knit group of young professionals who share a great passion for the world of web development and a continuous desire to grow and improve.

We love to compare and share our unique skills, professional and personal.

We love to experiment, study and grow, on a common path with the customer. At the centre is the goal, the strength to change and choose the best tool.

We are Cloud Architects, Web Developers, Smartphone Mobile App Developers. We are people first! We like to work hard but also laugh, eat pizza, drink great wine, listen to punk music and ride our bikes.
