> More about Are Films S.B Srl

To be positive, because anything that can be thought of can be done, if you dare.

To be brave, because limits don't exist, if you're ready to create change.

To be creative, because certain stories can move consciences, if you know how to get excited.

To be exciting, because a video that travels around the world is a story that has no borders.

We are all this because we want to act to improve the world around us and which does not let us sleep, we want to address the issues of poverty, social inequalities, pollution, lack of information and training, to create a better reality, which inspires whoever looks at us to be better.

We do this by creating content that touches the conscience, telling true stories, giving voice to those who have something to say, creating a profound intimacy, almost a symbiosis, with those who watch us.

We do it because dedicating our lives to creating, experimenting, innovating, dreaming and exciting is more than our job: it is our goal, our mission.
