BIT

> More about BIT

Bit is a young and innovative ICT System Integrator with offices in Turin and Milan.

It operates across three different business models:

- Development of turnkey solutions and maintenance
- Development of products in the Cloud and IoT domains
- Consulting services

The company's mission is to support its clients, located across the national territory, in the implementation and management of Digital Transformation programs.

Our team consists of over 160 professionals, including Azure DevOps Engineers, Cloud Architects, AWS DevOps Engineers, Full-Stack Developers, and Front-End Architects.

For years, we have collaborated with leading market players, working on projects in sectors such as Finance, Manufacturing, Automotive, Energy & Utilities, Retail, and Food & Beverage.

In recent years, the company has been certified under ISO 9001 and ISO 27001 standards, two important recognitions that demonstrate how our business processes are protected and monitored.
