> More about CWS S.R.L.

Founded in 1987, CWS has been a system integrator and software house for 35 years, supporting organizations in the digitalization of work, consumption, entertainment and production with innovative solutions that integrate physical and digital spaces. With 120 employees and consultants in 4 offices in northern Italy, CWS is motivated by a strong culture of technological innovation and has up-to-date know-how on focal topics such as AI, Big Data, IoT and Cyber Security. Thanks to this, it can boast of complex projects ranging from multimedia installations for important Italian museums, to connecting application systems of major banks and insurance companies, to creating Smart Cities for international customers. It started out in the Banking and Insurance sectors and now operates also in many other areas with dedicated teams: Multimedia and Customer Engagement, Infrastructure and Security, Data Management, Document Management, Solution Factory, Mobile, IoT & Custom Applications, and Artificial Intelligence. More than 3,500 projects completed, partnerships such as Samsung, Boomi and Microsoft, and a proprietary product, the flexible cloud-based digital signage platform, Livion.
